#### RADIO MANUAL

(Continued From Yesterday.)

On the first floor of the Naval Observatory there are two trans-mitting clocks Only one is used, but the other stands ready in the event the one in operation gets out of or-der. Eastern Standard Time, or 75th der. Enstern Standard Time, or fatti meridian time, is taken from the master clock in the vault below and by means of the transmitting clock, connected by wires with the Naval radio station at Arlington, Virginia, time is broadcast into the ether. Each tick of the clock completes the electrical classift and a radio dot is olectrical circuit and a radio dot is sent simultaneously into space on the 2050-meter wave length.

Despite its great speed, radio canpospite its great speed, radio cannot supply absolutely correct time, because of what is known as the "rate" of the clock, together with a mere fraction of a second which is lost in the relay. These very minute losses simply show that Father Time does not walt for even the quickest of mechanical parts to operate

This is the night fans who tuned in George McDonald last Thursday have been anticipating with delight. The popular young local planist will be on WJAM. The Gazette-Light company again, playing a program of popular numbers from 7 to 9.15 o'clock

Request numbers will be played by "Mac," he promises, and he has also intimated that some surprise features are in store, although he has not said what they would be. The telephone number at the studio is 5706.

The Blue Bird orchestra of Iowa City, which made a hit in its previous appearance in the city, will be on the air from Dreamland ballroom between 9:30 and 10:30

TIME does not wait for even the quickest of mechanical parts to operate

The Naval radio station at Key West was formerly connected with Arlington by land wires so it could send out time signals. The Florida signals lagged about twenty-eight hundredths of a second behind those of Arlington The fraction of a second lost in the operation of several relays which connect, the southern station with Washington Key West transmitted time on 2000 meters, so that on a winter night, when atmospheric conditions were well suited for radio, northern receiving stations could be tuned to hear both Arlington and Key West time signals. The Florida signals lagged about twenty-eight hundredths of a second behind those of Arlington The fraction of a second behind those of Arlington West was formerly connected with Arlington by land were so it could signals lagged about twenty-eight hundredths of a second behind those of Arlington The fraction of a second behind those of Arlington with Washington Key West transmitted time on 2000 meters, so that on a winter night, when at mospheric conditions were well suited for radio, northern receiving stations could be tuned to hear both Arlington and Key West time signals. The Florida signals lagged about twenty-eight hundredths of a second behind those of Arlington West was formerly connected with Arlington by land out time signals. The Florida signals lagged about twenty-eight hundred

(Continued tomorrow) 'SUB" SAILOR LIKES TO **SOLVE GAZETTE PUZZLES** 

Alvin Sorensen, a Cedar Rapids young man, works for Uncle Sam on the S.29, a submarine stationed near the Panama canal. He is a subscriber for The Even-

ing Gazette, and lately, eince the cross-word puzzles have been started in this paper, has found great interest, with his mates on the "sub," in solving the intricacies of these

in solving the intricacies of these teasers.

But the world's "meanest man," so Mr Sorensen writes his parents, Mr. and Mrs. Julius F. Sorensen, 1727 Sixth avenue, has been filling in the puzzles before they arrive outho S-29. So when the young man wants to have some fun working a cross-word, he grabs the latest Gamette only to find that all or part of the words have been penciled in the blank squares.

blank squares.

Who does this between the time. The Gazetto leaves the city, and arrives on the 8-28, appears a mystery too deep for even the shrewdest cross-word puzzle fan to penetrate.

#### Local Man Elected Vice-President Of Iowa Beverage Men

DES MOINES, Jan. 8.—(By Associated Press).—Officers of the Iowa Manufacturers of Carbonated Bev-Manufacturers of Carbonated Leverages were re-elected at the concluding session of a three day convention here yesterday.

The executive committee will decide on the next meeting date and the convention city. Fort Dodge, Dubuque, and Des Moines asked for the next session.

he next session.

The officers include: J. E. Johns

of Keokuk, president, William Tehel, Cedar Rapids, vice-president.

### Why have a radio set that takes a power plant to op

#### When a 3 Tube Receiver will do the work

Look at him-just all tired out!

There he is-after toting home a basket full of tubes—expensive tubes, tubes that cost real money and take a power plant to operate. He's put them in his set, all right. He's thrown on the juice.

More money! First a small fortune for tubes. Then expensive drain on his batteries. Oh, man, but he's tired! Next time he'll know better,

Why should you use a flock of tubes? Why? When 3 tubes do the work of 6. 3 tubes! Do you get it? 3 tubes in the new Grimes Official

Laboratory Model 3X-P-a real set. Tune in on this new Inverse Duplex Receiver.' Its cost is so small; but, oh boy, how it do work! Visit our store! See it! Hear it! Buy it!
